

FOR IMMEDIATE RELEASE

## **Jet Shades Introduces the One Essential Upgrade Every Cirrus G6 and G7 Needs for Enhanced Comfort and Safety**

Maximize cockpit comfort, protect your aircraft's interior, and shield against harmful UV rays with FAA-approved, custom-designed Jet Shades for the Cirrus G6 and G7.

FERNANDINA BEACH, FL, March 4, 2025 – Jet Shades, the aviation industry leader in premium in-flight pilot sun protection, is excited to announce the release of its Generation 2 Jet Shades for the Cirrus G6 and G7 aircraft. These new shades represent the latest in aviation innovation, offering pilots and passengers enhanced comfort, safety, and protection from the sun's harmful effects during flight.

While the Cirrus G6 and G7 are already top-tier aircraft with luxurious features like factory-tinted rear windows and air-conditioning, the sun's heat, glare, and UV rays can still present challenges while flying, particularly for pilots. Jet Shades offer the solution to all of these challenges in the pilot side windows while adding UV and heat protection for the rear windows that have factory tint. What's more, they ease the strain on the A/C, enhancing its efficiency and providing clear visibility for both pilot and passengers to spot traffic and enjoy sightseeing.

Made from high-performance optical quality materials, Jet Shades provide unparalleled UV protection, glare reduction, and heat management. These shades have been reported to reduce cabin temperature by up to 25 degrees! FAA-approved for both in-flight and ramp use, Jet Shades meet the highest safety standards, providing aircraft owners with confidence that the product has passed rigorous testing for aviation use.

“Sun protection is a critical issue for pilots, but it should never come at the expense of performance,” said Kevin J. Duggan, President of Jet Shades. “Our Generation 2 Jet Shades for the Cirrus G6 and G7 are designed to provide superior comfort while preserving visibility and protecting the aircraft. And with FAA approval, pilots can trust that these shades meet the necessary safety and quality standards to be a valuable addition to their aircraft.”

Key Features of Generation 2 Jet Shades for Cirrus G6 and G7:

- FAA-approved for in-flight and ramp use, ensuring full compliance with the highest aviation safety regulations.
- UV protection: Blocks 99.9% of harmful UV rays to reduce the risk of skin damage and protect aircraft interiors.

-more-

- Heat and glare reduction: Keeps the cockpit cooler, reducing glare and pilot fatigue for longer, more comfortable flights.
- Tailored fit for Cirrus G6 and G7: Engineered specifically for this model, ensuring a perfect fit and easy installation.
- Durable and lightweight: Designed to withstand high temperatures while maintaining long-lasting performance.

## Available Configurations

Generation 2 Jet Shades for the Cirrus G6 and G7 are available in three configurations to suit different needs:

- 6-Piece Total Solution: Complete protection for all windows
- 3-Piece Cockpit Solution: Protection for the windshield and pilot/copilot windows
- 1-Piece Windshield Solution: Focused protection for the windshield

These custom sunshades are already receiving rave reviews from pilots who appreciate the comfort they bring to their flying experience. With the intense sun glare often experienced in the cockpit, Generation 2 Jet Shades for Cirrus G6 and G7 offer a solution that enhances safety and improves the overall quality of each flight.

"What a difference in my G7! I didn't think my G7 could feel any more comfortable," said Dustin J., an early adopter of the new shades. "The Jet Shades not only look great—they really cut the heat."

Jet Shades continues to innovate, constantly listening to feedback from pilots to refine and perfect their products. The release of Generation 2 Jet Shades for the Cirrus G7 is the latest example of how the company is reshaping the way pilots experience the cockpit by combining cutting-edge technology with a deep understanding of pilot needs.

## About Jet Shades

Jet Shades is a leading provider of high-quality aircraft sunshades, known for their innovative designs and commitment to safety, comfort, and performance. Jet Shades products are FAA-approved, easy to install with no Supplemental Type Certificate (STC) required, and offer unparalleled protection against UV rays, heat, and glare. Trusted by over 6,000 pilots worldwide, Jet Shades is committed to improving the flying experience for pilots of all types of aircraft.
